

1. Installation instruction

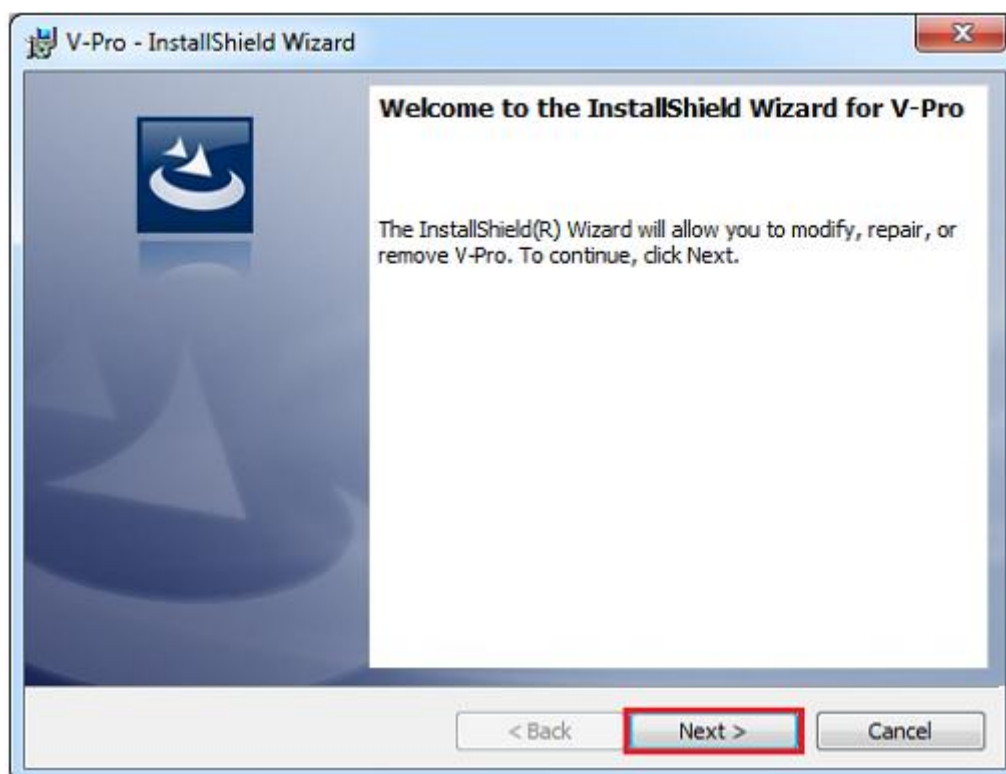

1.1 Equipment requirements

- The computers with Microsoft operating system: WinXP, Win7, Win8 and WinVista
- Users have Administrator's powers or Power user if source is used for software installation
- The following IP/Port is not be blocked by computer's or LAN firewall as below table:

125.234.253.148/210.245.115.203	8000
	80
	443
	9000
	21001~21010
	22001~22010

1.2 Installation

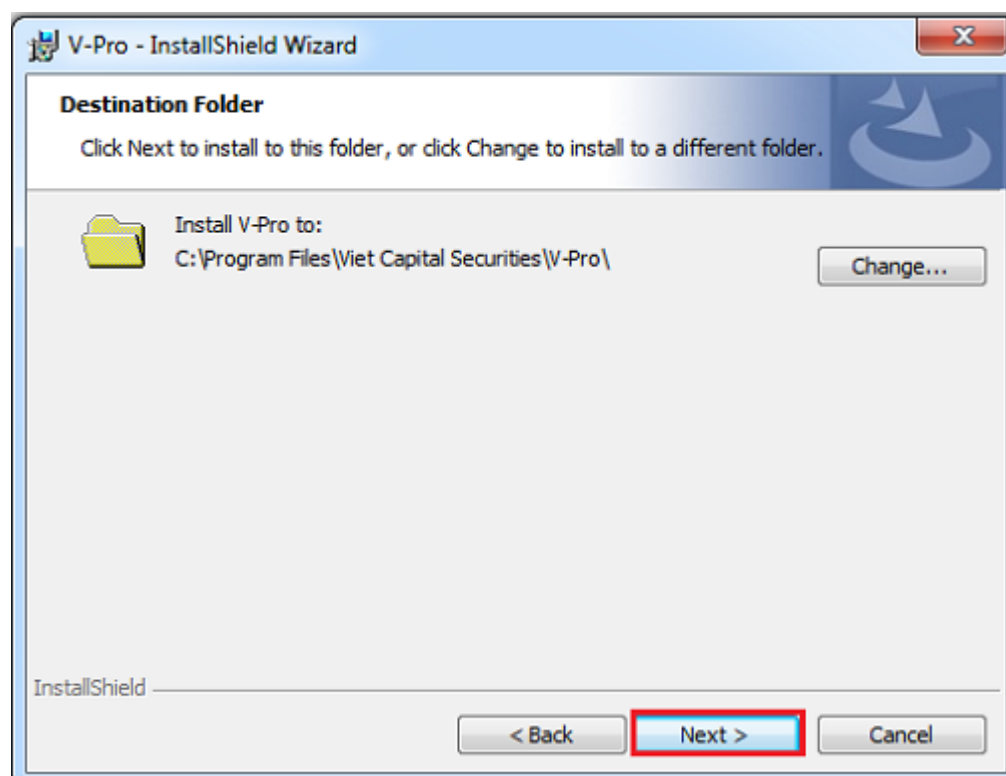

- Step 0: Download Vpro at VCSC's website: http://www.vcsc.com.vn/Upload/V_Pro_full.zip
- Step 1: After download to your computer, unzip the file and double click to the file "VPro_setup_new.exe"
- Step 3: Click Next as below illustration

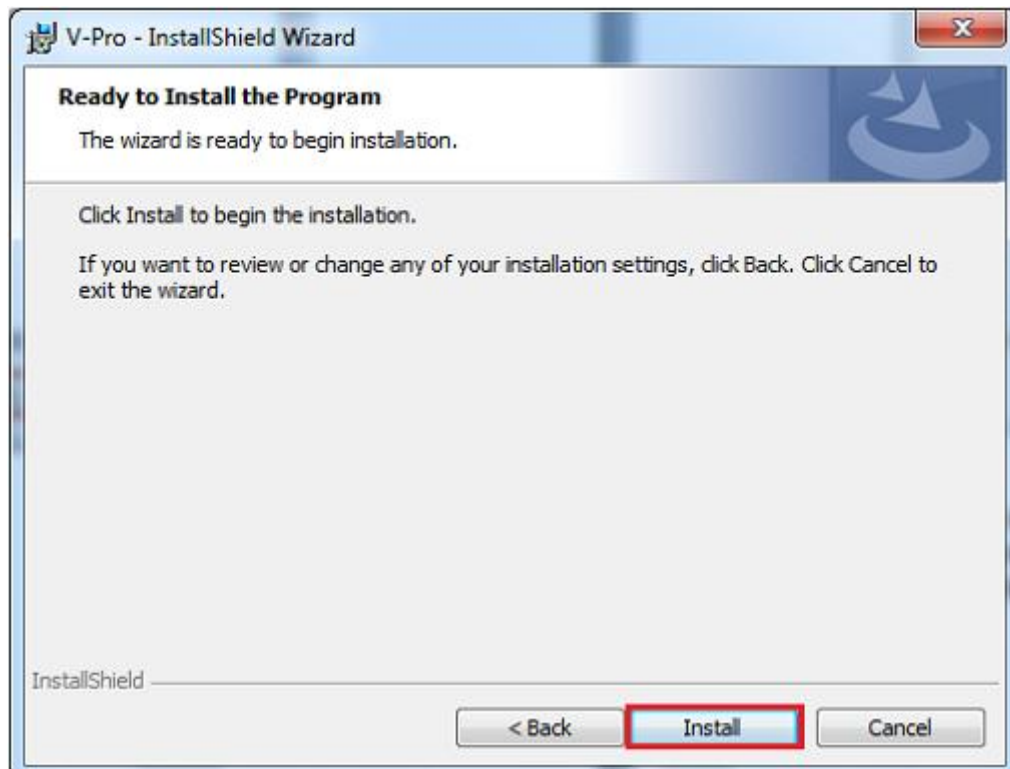

- Step 3: Check to box as below and then click Next

- Step 4: Click Next

- Step 5: Click Install

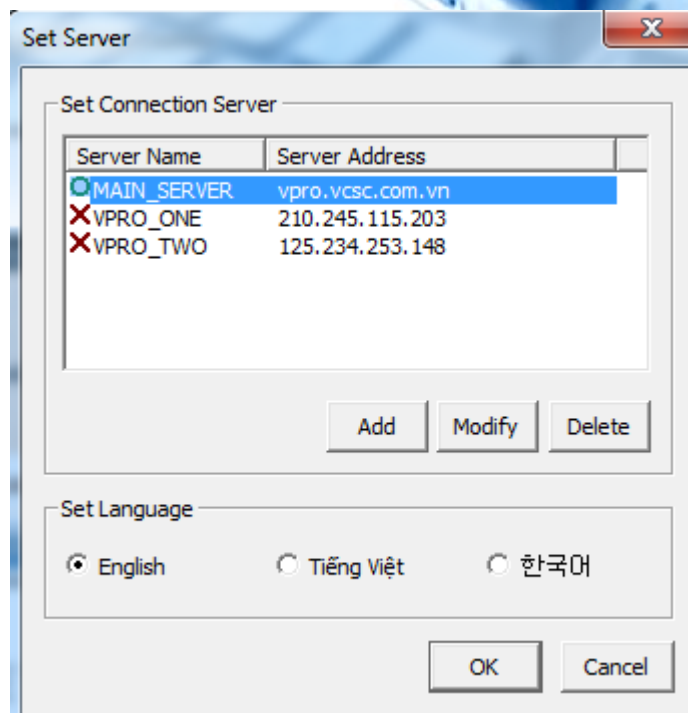

- Step 6: Click Finish and completing installation

1.3 Instruction for sign-in to the system

- After successful installation, yellow VPRO icon shall be found in your desktop

Double-click to this icon and sign-in by your ID and password provided when your account is established (if such details have not been provided, please contact our customer service to be provided). In addition, you could select language or server in option of “Cài đặt” as below illustration.

Once successful sign-in by your ID and password, the system shall require your further OTP's password (this password is matrix tab) as bellow. If you have not receive this data, please contact our customer service to be provided.

Series: 0900100001						www.vcsc.com.vn					
1	5473	2	6711	3	5137	4	1001	5	1558

	Setting alarm
	Show downward line
	Data Grid line
	Text window
	Data window
	Auto trend line: In clicking the key, through waveform change of stock price, trends of stock price will be distinguished automatically and trend line will be drawn automatically, too
	Automatic pattern analysis
	Candlestick pattern. All candlestick patterns will be shown by arrow. Clicking arrow, the name and date of such pattern will appear in rainbow. If double-click the arrow, the window of candlestick pattern will be transformed into notes and mini chart will be displayed as a pop-up
	The users can view the list of indicators of saved bookmarks, when the corresponding items are selected, the indicators will be added in the chart
	Cancel trend lines: When the trend line is selected, click mouse will change it to pencil, the selecting unable for trend line structure and reuse it when the mouse is changed to the mode of zoom in/zoom out. By this function, right click the mouse in the mode of pencil-shaped trend line structure, the mouse will be change the zoom in/zoom out mode.
	Cross trend line. After creating a straight trend line, double click to the newly created line, such trend lines will be zoomed in/out, colored or lined.
	Horizontal trend line
	Vertical trend line
	Skyway trend line
	Round and square: adding round or square in part to be emphasized. It is used for the stock price volatility in a certain range or for adding the square in part to be emphasized.
	Pencil
	Use for adding text
	When pressing icon of insertion, can add icons and text in various shapes
	Fibonacci
	Fibonacci curve: Drag the point where the user selects (high point and low point) and drop it in desired point (high point and low point), the curved trend line will be created. Through the position of the stock price (resistance/maintain/pass) and the curve at right of center line, the trends could be able to be analyzed.
	Fibonacci angles: Drag the point the user selects (high point and low point) and drop it at the desired point (high point and low point) to create a 3-angle Fibonacci angle line. In boundary along this line, a line is created in proportion of 23.6, 38.2, 50, 61.8, the just created line and the stock price (resistance/maintain/pass) will be a basis for analyzing trends

	Fibonacci time
	Fibonacci valuation: Drag the point the user selects (high point and low point) and drop it at the desired point (high point and low point) to create a zone line. It is used for calculating Fibonacci target price. In comparison with the increase (decrease) width of 23.6%, 38.2%, 50% and 61.8%, the corresponding valuation width could be found.
	Fibonacci valuation
	Three/four-section lines. Select the arrow next to the key, the you can select 3 or 4-section lines
	Straight regression line/ regression channel. Regression line: If linking the highest point and lowest point of price on the chart, then parallel line in the link will appear. This parallel acts as the trend of the selected area. Regression channel: If linking the highest point and lowest point of price on the chart, in link, 3 parallel lines channel will appear. Such parallel lines mean as the trend line of resistance at the top of the window, trend line at the bottom of the window and the trend line of pass at center.
	This is the function to count the number of candles in the chart, the user selects an area of certain price chart, bullish/bearish rate and the number of basic candle to be displayed.
	Eliot wavy line. This function helps to create automatically an Eliot wavy line in market price chart. This waveform line could be set all by double clicking.
	Delete each trend line
	Press the button to delete all trend lines created

2.4.2. Daily chart (4010): as same as Summary chart

2.4.3. Weekly chart (4011): as same as Summary chart

2.4.4. Monthly chart (4012) as same as Summary chart

2.4.5. Joint chart (4013) as same as Summary chart

2.4.6. Technical chart over time (4020): This is the window to lookup at same time the tick and candle charts by day, week and month of a securities symbol

On the chart window (4001), it is also capable of searching by the types of time but with this window, you will recognize its utility while simultaneously searching just with 1 click

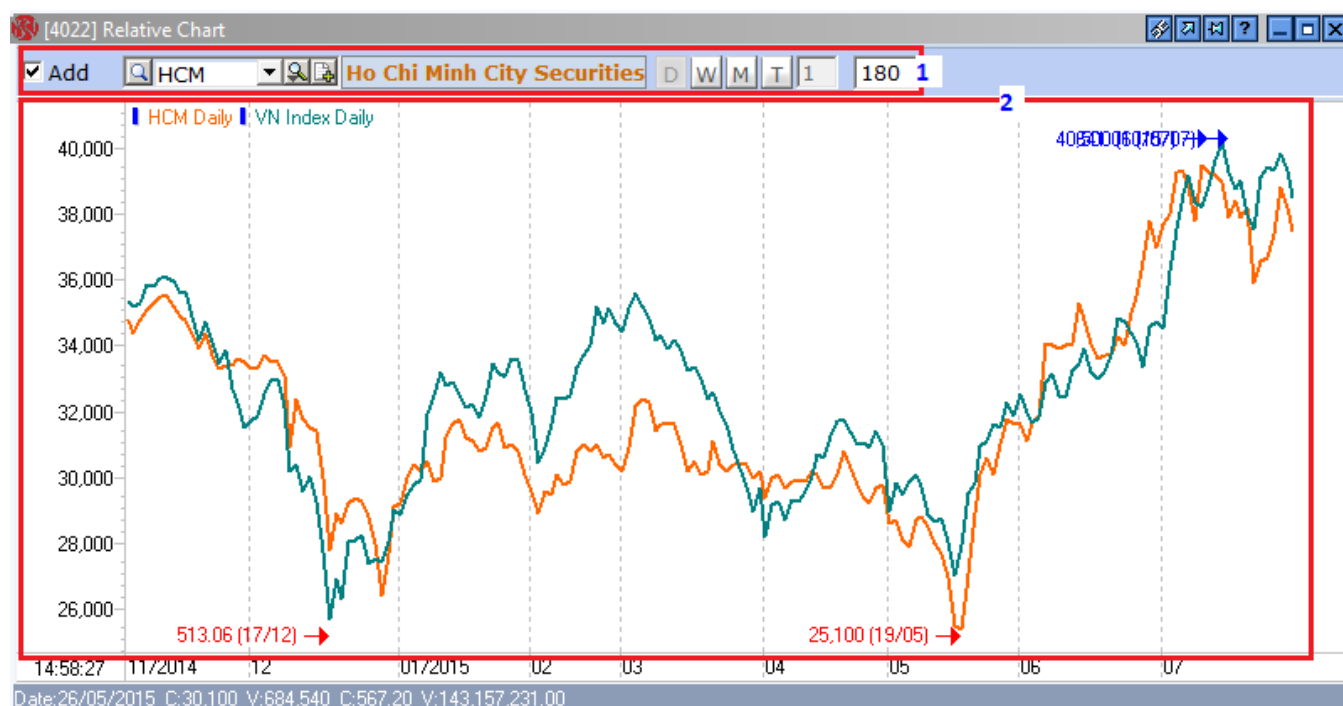

Items	Notes
